PERSONAL INFO

- Date of birth: 4 January 2002
- Driving licence: B

PROFESSIONAL SUMMARY

I am a determined and curious person with a have a strong passion for AI and systems administration and automations to improve work efficiency.

I use to approaching every challenge with full dedication and commitment, believing that consistency and passion are the keys to achieving tangible, high-quality results.

EDUCATION

Bachelor's Degree in Computer Engineering

University of Studies, Brescia

September 2021 - October 2024

Master's Degree in Computer Engineering

University of Studies, Brescia

September 2024 - Now

RECENT PROJECTS

F1 Pit Strategy Predictor

Deep learning pipeline predicting pit stops and tire choices from FastF1 telemetry; 0.78 AUC, 78% accuracy.

Network Hardening Planner

AutoPlanning system generating optimal enterprise security hardening strategies balancing safety and operations.

Work Performance Trading

Built a Java app for automated resource exchange with GUI, modular architecture, and optimization tools.

dataNexus Big Data Engineering

Built Big Data pipelines on Amazon, LAPD, and arXiv datasets; compared DB models and distributed computing.

RELEVANT COURSES

Machine Learning & Data Mining

Supervised/Unsupervised • SVM, Random Forest, Clustering • Feature Engineering • Model Selection • Cross-Validation • Performance Metrics • Data Pipelines • Scikit-Learn, LangChain, LangGraph

Deep Learning & Neural Networks

CNN, RNN, LSTM • Transformers (BERT, GPT, LLMs) • Backpropagation • Regularization • Hyperparameter Tuning • Computer Vision • NLP • PyTorch, Keras

Big Data & Data Engineering

Apache Spark, Hadoop, MapReduce • NoSQL (MongoDB, Cassandra) • Data Lakes, Data Warehouses • ETL Pipelines • Distributed Systems • OLAP • Business Intelligence • Scalable Data Processing • Numpy, Pandas, Matplotlib

Artificial Intelligence & Reinforcement Learning

Q-Learning, DP, TD • FOL • Search Algorithms (A*, BFS, DFS) • CSP • Automated Planning • Multi-Agent Systems • Gymnasium, Stable Baselines3, UP, n8n

Cryptography & Network Security

AES, RSA, Diffie-Hellman • TLS/SSL, IPsec, VPN • PKI, Digital Signatures • Hashing (SHA, HMAC) • Wireshark • Network Forensics • IDS/IPS (Suricata) • Vulnerability Scanning • Secure Protocols • FastAPI, JWT

Systems Administration & Operating Systems

Linux, Windows Server, macOS • Bash/Shell Scripting • Active Directory, Kerberos • File Systems & Memory • Virtualization & Cloud (AWS) • Apache, BIND

CERTIFICATIONS

Certified Cybersecurity Technician (CCT)

Conducted hands-on labs covering malware handling (Trojans, RATs, worms), network attacks (MITM, DoS, SQLi, WPA2 cracking), and system auditing. Deployed and configured firewalls, IDS/IPS (Suricata, Wazuh, Splunk) and performed OpenVAS vulnerability scans. Hands-on with PCAP analysis, capture filters and protocol dissection with Wireshark.

EC-Council Metasploit Fundamentals

Hands-on with Metasploit Framework, Meterpreter, MSFvenom, Nmap, privilege escalation, persistence, and lateral movement, including reconnaissance, exploitation and payload delivery.
